

openQA Project - action #88061

Fix premature cancel of a job when strange character is encountered

2021-01-20 13:25 - ilausuch

Status:	New	Start date:	2021-01-20
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Concrete Bugs	Estimated time:	0.00 hour
Target version:	future		
Difficulty:			
Description			
Problem			
When in tests code is introduced a strange character openQA finished incomplete with this message			
Result: incomplete finished about 6 hours ago (12:54 minutes)			
Reason: backend died: No map for 'Ã' at /usr/lib/os-autoinst/consoles/VNC.pm line 741.			
Example:			
http://10.161.229.197/tests/173			
To test that use this lines. Note that the problem is in --network-alias where the second dash (the bad) is different to the first one (the good)			
<pre>podman run -d -e POSTGRES_PASSWORD=openqa -e POSTGRES_USER=openqa -e POSTGRES_DB=openqa --network-alias=db --name db postgres</pre>			
In a console podman fails with this error:			
Error: unknown shorthand flag: 'â' in --network-alias=db			

History

- Category set to Concrete Bugs
- Priority changed from Normal to Low
- Target version set to future

I think this is one case of "good to know but easy to workaround" :) Hence prioritizing accordingly

Provided you know what it is. The error message is the problem, not the "behavior"

<https://github.com/os-autoinst/os-autoinst/pull/1616>

I closed the PR with my very simple attempt at making the error message more helpful. Maybe somebody can think of a more wholesome approach.
