

openQA Infrastructure - action #88197

Workflow for staged deployments

2021-01-25 16:12 - cdywan

Status: Workable	Start date: 2021-01-22
Priority: Low	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version: future	

Description

Motivation

Because of [#88195](#) and because we currently don't have staging machines for all of the setups used in production, we want to deploy changes on select machines from time to time. Usually it means a branch with changes that haven't been merged to the default branch yet. However we have no scripts, CI pipeline or documented workflow for this.

Acceptance criteria

- **AC1:** A production machine can easily be updated from a branch

Suggestions

- Document steps for "staged deployments" in the wiki
- Provide a script that targets one or multiple machines
- Configure new or existing CI for "staged deployment"

History

#1 - 2021-01-26 08:54 - okurz

- Priority changed from Normal to Low

- Target version set to future

good idea, +1
