

## openQA Project - action #88594

coordination # 80142 (Blocked): [saga][epic] Scale out: Redundant/load-balancing deployments of openQA, easy containers, containers on kubernetes

coordination # 55364 (Resolved): [epic] Let's make codecov reports reliable

### codecov reports for individual files yield "forbidden" and files can not be shown

**Description**

### Observation

Following the file and folder tree view in <https://codecov.io/gh/os-autoinst/openQA> does not show file reports anymore but instead messages like "GitHub API: Forbidden Is the path t/33-developer\_mode.t a relative path in your repository?" pointing to <https://docs.codecov.io/docs/fixing-paths>

### Steps to reproduce

- go to <https://codecov.io/gh/os-autoinst/openQA/tree/master>
- follow links to individual files, e.g. <https://codecov.io/gh/os-autoinst/openQA/src/master/lib/OpenQA.pm>
- observe error message

### Acceptance criteria

- **AC1:** Individual file reports can be shown again
- **AC2:** No need to hardcode multiple individual folder or file paths in any config files

### Suggestions

Maybe something changed on codecov side or we changed something in how we generate reports and we need to change something. Maybe it's enough to just add

```
fixes:  
  - "/home/circleci/openQA::"  
in codecov.yml
```
