

## openQA Tests - action #88792

### [sle][TW][security][backlog][FIPS] Implement & Integrate samba test case into openQA

2021-02-19 08:41 - bchou

<b>Status:</b>	In Progress	<b>Start date:</b>	2021-02-19
<b>Priority:</b>	Low	<b>Due date:</b>	
<b>Assignee:</b>	bchou	<b>% Done:</b>	0%
<b>Category:</b>	New test	<b>Estimated time:</b>	40.00 hours
<b>Target version:</b>			
<b>Difficulty:</b>			
<b>Description</b>			
Jira ID: SLE-15098: QA: Update samba to 4.12+ for FIPS compliance and increased performance			
Plan to import the samba related case into FIPS mode			
<ul style="list-style-type: none"><li>• samba_adcli</li><li>• sssd_samba</li></ul>			
yast2_samba is still with blocked issues. Blocked by poo#61780: [functional][y][epic] test update for yast-samba re 389-ds Blocked by poo#70639: [functional][y] test fails in yast2_samba - Unable to find the Domain Master Browser name QA-WORKGROUP for the workgroup QA-WORKGROUP.			
<a href="https://openqa.opensuse.org/tests/1587572#step/yast2_samba/68">https://openqa.opensuse.org/tests/1587572#step/yast2_samba/68</a> .			
Bugs bs#1177302 and bsc#1172084 have not been updated yet.			

## History

### #1 - 2021-02-22 01:42 - bchou

Rodion mentioned:

Yast module has blocking issues, I do not expect them to get self resolved and we didn't get updates in the bug reports samba itself should be functional. For this case, I would suggest not introducing extra dependency on YaST module. Our customers seem to use native tools to configure it

yast2 samba is just a UI to configure smb, people normally use config files directly

### #2 - 2021-05-24 08:32 - bchou

- Priority changed from Normal to Low

### #3 - 2021-05-25 07:40 - bchou

- Subject changed from [sle][security][sle15sp3][FIPS] Implement & Integrate samba test case into openQA to [sle][security][sle15sp4][FIPS] Implement & Integrate samba test case into openQA

Move this ticket to SLE15 SP4 as SLE15 SP3 is GM.

### #4 - 2022-05-09 02:06 - llzhao

- Subject changed from [sle][security][sle15sp4][FIPS] Implement & Integrate samba test case into openQA to [sle][security][backlog][FIPS] Implement & Integrate samba test case into openQA

### #5 - 2022-06-07 09:07 - bchou

We can integrate samba\_adcli into our FIPS test scope.

Functional group is running the test on SP4 b151.1

[https://openqa.suse.de/tests/8752515#step/samba\\_adcli/97](https://openqa.suse.de/tests/8752515#step/samba_adcli/97)

This test content is more complete.

```
./tests/network/samba/samba_adcli.pm
```

### #6 - 2022-06-20 07:20 - bchou

- Subject changed from [sle][security][backlog][FIPS] Implement & Integrate samba test case into openQA to [sle][TW][security][backlog][FIPS] Implement & Integrate samba test case into openQA

- Assignee changed from bchou to StarryWang

Hi Starry.

I think this case is worth pulling into TW for regular testing.

Thank you.

**#7 - 2022-06-20 07:27 - StarryWang**

- Status changed from New to In Progress

I'll try to add samba\_adcli into extra\_tests\_textmode on TW.

**#8 - 2022-06-21 02:37 - StarryWang**

- File Screenshot from 2022-06-21 10-29-40.png added

The test samba\_adcli failed on O3:

[https://openqa.opensuse.org/tests/2426291#step/samba\\_adcli/46](https://openqa.opensuse.org/tests/2426291#step/samba_adcli/46)

I found that dig srv\_kerberos\_tcp.geeko.com and dig ldap\_tcp.geeko.com did not found the IP address of these domains:

[https://openqa.opensuse.org/tests/2426291#step/samba\\_adcli/40](https://openqa.opensuse.org/tests/2426291#step/samba_adcli/40)

[https://openqa.opensuse.org/tests/2426291#step/samba\\_adcli/43](https://openqa.opensuse.org/tests/2426291#step/samba_adcli/43)

On OSD, the IP address of these domains are internal access.

**#9 - 2022-06-21 02:38 - StarryWang**

- File deleted (Screenshot from 2022-06-21 10-29-40.png)

**#10 - 2022-06-21 03:07 - bchou**

Thanks Starry for the investigation,

I think this case is not able to migrate into TW directly since the domain server is different.

BTW, talk to Starry offline, it seems there is no samba related test case in TW now.

**#11 - 2022-06-24 03:49 - StarryWang**

- Assignee changed from StarryWang to bchou

Assign back to Ben :-)
