<b>Description</b>			
HI,  Logging in to openqa.opensuse.org via OpenID instead logs me into mirrorcache-eu.opensuse.org, but not openqa.  Ciao, Marcus

### History

#### #1 - 2021-02-19 12:46 - cboltz

- Category set to Core services and infra
- Assignee set to bmwiedemann

#### #2 - 2021-02-19 13:12 - bmwiedemann

- Assignee changed from bmwiedemann to andriinikitin

It works here atm.

We had this before. Andrii Nikitin is the developer+admin of mirrorcache.

#### #3 - 2021-02-19 13:24 - andriinikitin

I blame epsilon , because problem randomly raises for some period of time and then disappears, without any changes from mirrorcache side. Moreover, today for me it did redirect to localhost when I tried to login to both openqa.o.o or mirrorcache.o.o And a colleague of mine did share the same experience few days ago.

[bmwiedemann](#) is there chance you send me epsilon logs for today, at least for andriinikitin log attempts and maybe meissner?

#### #4 - 2021-02-19 13:39 - andriinikitin

Btw these are times (probably CET, but may be UTC) where login did misbehave:

2021-02-17 08:03:33  
2021-02-17 08:20:13  
2021-02-18 09:45:52  
2021-02-18 10:13:44  
2021-02-18 10:18:44  
2021-02-18 11:46:11  
2021-02-18 12:14:30  
2021-02-18 12:55:12  
2021-02-18 12:56:07  
2021-02-18 13:20:06  
2021-02-18 13:51:42  
2021-02-18 14:11:50

#### #5 - 2021-02-19 18:24 - andriinikitin

- Assignee changed from andriinikitin to bmwiedemann

Current known cases are (Where users try to log in -> where they are redirected):

1. openqa.opensuse.org -> mirrorcache-eu.opensuse.org
2. openqa.suse.de -> mirrorcache-eu.opensuse.org
3. local instance of openqa -> mirrorcache-eu.opensuse.org
4. local instance of mirrorcache -> openqa.opensuse.org
5. local instance of mirrorcache -> localhost
6. mirrorcache-eu.opensuse.org -> localhost

I was trying to debug log provided by Bernard and see a case with somebody's openqa instance, where the user gets a page containing:

```
[Fri Feb 19 10:30:01.977542 2021] [wsgi:error] [pid 29902] [remote 192.168.47.21:48512] <h4>You are being asked to login by
http://sleposbuilder2.suse.cz/</h4>
```

and then get this confirmation about new provider for the same request:

```
[Fri Feb 19 10:30:19.594603 2021] [wsgi:error] [pid 29902] [remote 192.168.47.21:48958] <p>The OpenID relying party
<b>https://mirrorcache-eu.opensuse.org/</b> is asking
```

I cannot imagine client's (mis)configuration which will result in such behavior.

I believe people more often land onto mirrorcache instance, because it sends requests to id.opensuse.org more often than necessary. I am addressing this particular issue, so the problem should occur less frequently.

( <https://github.com/andrii-suse/MirrorCache/pull/78> )

But I still think there is some concurrency issue at ipsilon side. Hopefully it will be less visible after my change.

#### #6 - 2021-02-19 19:39 - cboltz

The "current known cases" list is incomplete - for example, ticket [#88798](#) is about openqa.opensuse.org -> localhost

#### #7 - 2021-02-19 20:25 - okurz

- Related to tickets [#88798](#): Login to openQA not possible (request to localhost instead of openqa.opensuse.org) added

#### #8 - 2021-02-19 20:26 - okurz

- Private changed from Yes to No

#### #9 - 2021-02-19 20:26 - okurz

- Related to tickets [#88751](#): Problem login into openqa.suse.de and openqa.opensuse.org added

#### #10 - 2021-03-08 10:46 - bmwiedemann

- Status changed from New to Feedback

- % Done changed from 0 to 50

I moved our transactions sqlite DB to mariadb.

Also properly packaged up my custom patches from [pagure.io/forks/bmwiedemann/ipsilon](https://pagure.io/forks/bmwiedemann/ipsilon) devel branch and dist-upgraded to 15.2

The interesting question now is, if it keeps working when more mirrorcache logins happen again.

#### #11 - 2021-03-08 15:03 - okurz

thanks for the update. Yes, seems to make sense to await that feedback.

#### #12 - 2021-05-21 14:07 - tinita

I tried to login to <https://openqa.opensuse.org/> over 10 times half an hour ago, and it always prompted me with

```
The OpenID relying party http://127.0.0.1:3110/ is asking to authorize access to <myuser>
```

Reloading redirected me to <http://127.0.0.1:3110/>

#### #13 - 2021-05-27 10:46 - andriinikitin

Just an observation - today me and a colleague see often an error 'time\_bad\_sig: Return\_to signature is not valid.' when trying to login to mirrorcache-eu.opensuse.org and mirrorcache-us.opensuse.org .

It let me trough after several attempts.

For reference - example signature used: openid.return\_to=

<https://mirrorcache-eu.opensuse.org/response?oic.time=1622111887-fc18d886a6853dcb5e9e&openid.sig=V8h1e66hDPIF4ygY0LPGAo2gFal=>

Both machines were updated to leap 15.3 recently(, not sure if that matters).

**#14 - 2021-08-09 20:03 - Irupp**

- Status changed from Feedback to Closed

- % Done changed from 50 to 100

Bernhard fixed this a while ago.

Closing here.

**#15 - 2022-02-09 11:36 - tinita**

It happens for me and [osukup](#) again right now :(
