Design test plan for the yast2 samba module

2021-02-22 13:18 - riafarov

Status:	New	Start date:	2020-05-21
Priority:	Normal	Due date:	
Assignee:	oorlov	% Done:	50%
Category:		Estimated time:	0.00 hour
Target version:	Current		
Description			
We currently have multiple issues in current yast2 samba test https://openqa.opensuse.org/tests/latest?arch=x86_64&distri=opensuse&flavor=DVD&machine=64bit&test=samba_ncurses&version=Tumbleweed			
The issue is partly that we do not fully understand what is covered there and why. The idea of this epic is to start from scratch, identify parts of the module which can be tested (e.g. simple samba server as a file share) and then extend it to cover integration with LDAP and Active Directory, as well as figure out missing pieces.			
Subtasks:			
action # 67123: Move yast2_samba from dev group to prod			New
action # 88966: [timeboxed:24h] Research on yast2 samba module			Closed

History

#1 - 2021-02-22 14:19 - riafarov

- Target version changed from future to SLE 15 SP3

#2 - 2021-05-06 09:56 - riafarov

- Assignee changed from riafarov to oorlov

#3 - 2021-05-10 12:43 - oorlov

- Target version changed from SLE 15 SP3 to Current
