Target version:	QE-Core: Ready		
Difficulty:			
Description			
Hello team			
could you please remove migration tests from 42.X to Leap 15.3 and add migration test for Leap 15.2 -> 15.3 to Leap 15.3 Somehow we've forgot to request the most common scenario.			
Thank you

- Subject changed from [leap 15.3] - Please add migration testing from 15.2 to 15.3 and remove migration tests from 42.X to [leap 15.3][qe-core][migration] Please add migration testing from 15.2 to 15.3 and remove migration tests from 42.X

#2 - 2021-03-17 06:05 - okurz

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: zdup-Leap-42.1-gnome@64bit_cirrus
<https://openqa.opensuse.org/tests/1667130>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released"
3. The label in the openQA scenario is removed

#3 - 2021-04-01 05:03 - okurz

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: upgrade_Leap_42.1_kde
<https://openqa.opensuse.org/tests/1685860>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released"
3. The label in the openQA scenario is removed

- Status changed from New to Workable

#5 - 2021-04-13 07:55 - mgrifalconi

- Assignee set to mgrifalconi

#6 - 2021-04-14 14:45 - lkocman

Any progress on this one? Thank you

#7 - 2021-04-14 15:00 - mgrifalconi

Hello, as we talked over Rocket Chat, I scheduled the migration test for gnome and kde on the development section of o3 for testing:
https://openqa.opensuse.org/admin/job_templates/39

On the next leap build it will be executed and we can check how it goes!

#8 - 2021-04-15 09:12 - tjyrinki_suse

- Subject changed from *[leap 15.3][qe-core][migration] Please add migration testing from 15.2 to 15.3 and remove migration tests from 42.X to [leap 15.3][qe-core] Please add migration testing from 15.2 to 15.3 and remove migration tests from 42.X*

Removing migration team from the tags as QE Core is doing this.

#9 - 2021-04-16 07:24 - mgrifalconi

Small update:

Tests added to the Development section of Leap 15 in o3

```
opensuse-Leap-15.3-DVD-x86_64:  
- upgrade_Leap_15.2_gnome  
- upgrade_Leap_15.2_kde  
- upgrade_Leap_15.2_cryptlvm:  
  machine: uefi
```

Still waiting for a Leap build to trigger the execution of the tests.

About removing old tests: there was some discussion in Rocket Chat and IRC opensuse-factory and Oliver is still suggesting to keep them.

#10 - 2021-04-22 05:43 - mgrifalconi

Runs of

```
- upgrade_Leap_15.2_gnome  
- upgrade_Leap_15.2_kde  
- upgrade_Leap_15.2_cryptlvm:  
  machine: uefi
```

are now moved to the official Leap 15 job group. On the following build they will appear.

Cryptlvm took some time since the base image to use for upgrade test was not available and needed to be created and uploaded but now should be fine.

#11 - 2021-04-22 05:50 - mgrifalconi

We also found a discussion point: we may want to test update versions of the system before upgrade and not its old GM. Relative issue here
<https://progress.opensuse.org/issues/91554>

#12 - 2021-04-22 07:12 - okurz

#13 - 2021-04-26 08:53 - mgrifalconi

- Status changed from *Workable* to *Resolved*

- % Done changed from *0* to *100*

Hello,

```
- upgrade_Leap_15.2_gnome  
- upgrade_Leap_15.2_kde  
- upgrade_Leap_15.2_cryptlvm:
```

Are being scheduled on the Leap 15 job group in o3 so I will close this issue.

Not touching old tests because of the conversation with Oliver on IRC, please reopen (or open a new one) if you want the old tests being unscheduled. Thanks!

#14 - 2021-04-26 20:16 - okurz

- Status changed from *Resolved* to *Feedback*

- % Done changed from *100* to *0*

Thank you for adding these scenarios. But

https://openqa.opensuse.org/tests/overview?distri=opensuse&version=15.3&build=141.2&groupid=50&test=upgrade_Leap_15.2_gnome&test=upgrade_Leap_15.2_kde&test=upgrade_Leap_15.2_cryptlvm shows only the upgrade tests for "DVD". What about upgrade tests based on "NET" media? As I see upgrade tests for other versions I assume we should especially have them for the base 15.2 :) Sorry, if I interfered too early before your PO or something :)

Oh, regarding the "% Done" field I suggest to simply ignore that. Estimations in software development are very unlikely to get right to be able to say how far one has progressed anywhere between 0 and 100% :)

#15 - 2021-04-27 05:46 - mgrifalconi

Hey Oliver, thanks for pointing this out! I believe it's important to find any issue as soon as possible, no matter who finds it first!

Makes totally sense, I added the three runs on NET directly in the Leap 15 group this time, to not wait one more build to run in the development job group.

Thanks!

#16 - 2021-05-03 09:02 - mgrifalconi

- Status changed from *Feedback* to *Resolved*

- % Done changed from 0 to 100

Tests are now scheduled for both DVD and NET

#21 - 2021-05-19 05:18 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: [zdup-Leap-42.1-gnome@64bit_cirrus](https://openqa.opensuse.org/tests/1739027)
<https://openqa.opensuse.org/tests/1739027>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released"
3. The label in the openQA scenario is removed

#22 - 2021-05-21 09:34 - favogt

I removed the failing tests which attempt zdup from 42.x.

#23 - 2021-05-27 09:41 - lkocman

Thank you Fabian
