

openQA Infrastructure - action #89419

Incomplete jobs after OSD deployment

2021-03-03 15:07 - cdywan

Status:	Rejected	Start date:	2021-03-03
Priority:	High	Due date:	
Assignee:	mkittler	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Ready		

Description

Observation

- <https://openqa.nue.suse.com/tests/5581139> on grenache and incompleted with reason quit: worker has been stopped or restarted at *await_install*
- <https://openqa.nue.suse.com/tests/5581142> on grenache and incompleted with reason quit: worker has been stopped or restarted at *await_install*

Possibly interesting excerpts from the settings:

```
CASEDIR https://github.com/hjluo/os-autoinst-distri-opensuse.git#unlock
NAME      05581139-sle-15-SP3-Regression-on-Migration-from-SLE12-SPx-s390x-Buildhjluo_os-autoinst-distri-opensuse_unlock-offline_sles12sp4_ltss_pscs_sdk-asm-contm-lgm-tcm-wsm_all_full@hjluo_os-autoinst-distri-opensuse_unlock@s390x-kvm-sle12
```

Note: No alerts were observed.

History

#1 - 2021-03-12 14:01 - mkittler

- Status changed from New to Rejected

- Assignee set to mkittler

Incompletes with the reason quit: worker has been stopped or restarted are *expected* when a job has been cancelled because the worker was restarted. The jobs you've found have also been automatically cloned which is also expected. Hence the alerts are also not triggered by this behavior.

The only odd thing is of course that I've changed the deployment to avoid this kind of interruption so these kind of jobs shouldn't appear anymore unless one really stops a worker manually. The reason why the jobs you've found have been stopped is that openqa-worker.target was still active at the time on grenache-1 because it hasn't been restarted recently:

```
martchus@grenache-1:~> systemctl status openqa-worker.target
● openqa-worker.target - openQA Worker
   Loaded: loaded (/usr/lib/systemd/system/openqa-worker.target; disabled; vendor preset: disabled)
   Active: inactive (dead) since Wed 2021-03-03 16:18:21 CET; 1 weeks 1 days ago
```

Warning: Journal has been rotated since unit was started. Log output is incomplete or unavailable.

```
martchus@grenache-1:~> uptime
14:56:04 40 Tage 11:21 an, 1 Benutzer, Durchschnittslast: 1,43, 1,39, 1,50
```

But it is dead now and I've also took care about other workers in the meantime. So there's really nothing to be improved here at this point.
