Description	
Hi,	
can anyone please adjust https://en.opensuse.org/Portal:15.3 and sync it with the release schedule in https://en.opensuse.org/openSUSE:Roadmap#Schedule_for_openSUSE_Leap_15.3 ?	
Release dates are wrong.....and I'm not allowed to edit the page	
Thanks	
Axel

Looking at the revision history, it is Lubos who has been keeping that page up-to-date.

Portal pages are split into subpages, so you'll need to edit the subpage containing the wrong info.

The subpages of Portal:15.3 are not protected, and even if, you have permissions to edit everything on en.o.o.

So - do it yourself, and then close this ticket.

Ah OK, editing subpages worked. Thanks for the hint!
