### Description

#### Observation

E.g. see [https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/12238/checks?check\\_run\\_id=2286115726#step:5:32](https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/12238/checks?check_run_id=2286115726#step:5:32) failing with

```
! Configure failed for Inline-Python-0.56. See /github/home/.cpanm/work/1617787806.1116/build.log for details.
```

#### Problem

I would not have expected that os-autoinst-distri-opensuse CI checks try to install that package as it's listed as only a "test" requirement in <https://github.com/os-autoinst/os-autoinst/blob/master/cpanfile#L75>

### History

#1 - 2021-04-07 09:48 - okurz

- Status changed from In Progress to Feedback

<https://github.com/os-autoinst/os-autoinst/pull/1637>

#2 - 2021-04-07 22:26 - okurz

- Status changed from Feedback to Resolved

- Assignee changed from okurz to osukup

actually osukup fixed it better with <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/12243>
