containers: Fix github test "webui-docker-compose" timeout

2021-04-07 10:21 - ilausuch

Status:	Resolved		**Start date:**	2021-04-07
Priority:	Normal		**Due date:**	
Assignee:	ilausuch		**% Done:**	0%
Category:	Concrete Bugs		**Estimated time:**	0.00 hour
Target version:	Ready			
Difficulty:				

Description

Problem

The test webui-docker-compose exceeds 30 minutes and is cancelled with the message
"The job running on runner Hosted Agent has exceeded the maximum execution time of 30 minutes."

Acceptance Criteria

- **AC 1**: The test is executed without being cancelled

- Category set to Concrete Bugs

- Status changed from New to Feedback

- Assignee set to ilausuch

- Target version set to Ready

#3 - 2021-04-07 15:37 - okurz

The PR itself is ok to fix the exceptional cases when downloading packages for docker-compose takes that long that 30m is exceeded but concerns had been raised in https://github.com/os-autoinst/openQA/pull/3827#issuecomment-814865637 and https://github.com/os-autoinst/openQA/pull/3827#issuecomment-814968080 and https://github.com/os-autoinst/openQA/pull/3827#pullrequestreview-630154659 that 30m is too long as a common runtime for PR checks which can be adressed in this ticket or a follow-up. After merge I suggest you create a follow-up ticket which we put to "future" for now until we see that the "test runs too long" bothers us enough that we care to fix it :)

#4 - 2021-04-12 10:17 - ilausuch

I created this new ticket #90995 to cover an investigation to reduce the time of this test.
Could we resolve this one?

#5 - 2021-04-12 11:40 - okurz

Yes, please link progress tickets in the format #<id>, not the plain URL. And please set the other ticket as related.
