<b>Target version:</b>	Ready		
<b>Difficulty:</b>			

**Description**

#### Observation

openQA test in scenario opensuse-15.3-JeOS-for-RPi-aarch64-jeos@RPi3 fails in [vim](#)

The content appears correct, but the terminal does not use the correct font, so the needles don't match.

#### Test suite description

Maintainer: fvogt, mnowak

Start JeOS from the HDD image, configure it using the firstboot wizard and then run basic tests. console=tty0 added as needed for aarch64.

#### Reproducible

Fails since (at least) Build [7.1](#)

#### Expected result

Last good: (unknown) (or more recent)

#### Further details

Always latest result in this scenario: [latest](#)

#### History

##### #1 - 2021-04-30 07:46 - tjyrinki\_suse

- Subject changed from test fails in vim: ssh test use the wrong console font to [qac][jeos][opensuse] test fails in vim: ssh test use the wrong console font

- Start date deleted (2021-04-19)

##### #2 - 2021-05-14 10:45 - favogt

- Assignee changed from ggardet\_arm to okurz

I found where this was set and made a PR:

[https://github.com/os-autoinst/xterm\\_console/pull/1](https://github.com/os-autoinst/xterm_console/pull/1)

##### #3 - 2021-05-14 14:34 - favogt

Without the vim module, the test continues without errors, so I made a workaround needle until the PR is deployed.

##### #4 - 2021-05-14 22:14 - okurz

- Status changed from New to In Progress

ok. Services triggered in <https://build.opensuse.org/package/show/devel:openQA/xterm-console> . Awaiting next automatic installation within the o3 infrastructure.

**#5 - 2021-05-15 19:11 - okurz**

xterm-console was automatically installed in the updated version on o3 workers. I retrigged the referenced scenario, currently running: <https://openqa.opensuse.org/tests/1743086>

xterm-console was automatically installed in the updated version on o3 workers. I retrigged the referenced scenario, currently running: <https://openqa.opensuse.org/tests/1743086>

The referenced tests are the generalhw tests running on ggardet\_arm's systems at home, so we'll have to wait until it reaches those.

**#7 - 2021-05-16 19:26 - okurz**

- Due date set to 2021-05-28
- Status changed from In Progress to Feedback
- Target version set to Ready

right. waiting ... :)

**#8 - 2021-05-19 10:35 - favogt**

- % Done changed from 0 to 100

Fixed! <https://openqa.opensuse.org/tests/1748843#step/vim/3>

**#9 - 2021-05-28 11:06 - okurz**

- Status changed from Feedback to Resolved

<https://openqa.opensuse.org/tests/latest?arch=aarch64&distri=opensuse&flavor=JeOS-for-RPi&machine=RPi3&test=jeos&version=15.3> looks stable
