<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	SLE 15 SP3		

**Description**

### Observation

The module fails when the system is creating a new snapshot and it is expecting it to be marked as disposable. On successful runs, the number of the created snapshot is 18 and it is marked as disposable. When the number of the snapshot is 11, it's not marked as disposable. We need to figure out if this behavior is per design and adjust the module expectations or open a bug.

Blind guess, if it's on powerVM only, we should check if there is any test suite executed between image is created and this test suite. Therefore we should check that there are no extra snapshots in some runs and clean them up before the test execution to have the same setup in each run.

openQA test in scenario sle-15-SP3-Online-ppc64le-transactional\_server\_snapper@ppc64le-hmc-single-disk fails in [verify\\_undelete\\_snapshots](#)

### Test suite description

Test snapper features in a transactional update server

### Reproducible

Fails since (at least) Build [95.1](#)

### Expected result

Last good: [174.1](#) (or more recent)

### Further details

Always latest result in this scenario: [latest](#)

## History

### #1 - 2021-04-19 10:20 - syrianidou\_sofia

- Project changed from openQA Tests to qe-yast

### #2 - 2021-04-20 08:08 - riafarov

- Target version set to SLE 15 SP3

### #3 - 2021-04-20 08:51 - riafarov

- Subject changed from [sporadic] test fails in verify\_undelete\_snapshots to [timeboxed:16h][sporadic] test fails in verify\_undelete\_snapshots

- Description updated

- Status changed from New to Workable

### #4 - 2021-04-22 07:18 - riafarov

- Status changed from Workable to In Progress

- Assignee set to riafarov

**#5 - 2021-04-23 07:48 - riafarov**

- Status changed from *In Progress* to *Feedback*

<https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/12382>

**#6 - 2021-04-23 17:06 - riafarov**

- Status changed from *Feedback* to *Closed*

**#7 - 2021-05-09 06:37 - okurz**

This is an autogenerated message for openQA integration by the openqa\_review script:

This bug is still referenced in a failing openQA test: transactional\_server\_snapper@ppc64le-hmc-single-disk  
<https://openqa.suse.de/tests/5975051>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released"
3. The label in the openQA scenario is removed
