Target version:	Ready		
Difficulty:			
Description			
Observation			
The openQA API documentation mentions (e.g. https://openqa.opensuse.org/not_found) mentions the route:			
<pre>+ /groups GET</pre>			
but this route does not appear to work for me.			
Could /job_groups be meant instead here?			

History

#1 - 2021-04-26 08:34 - mkittler

There's no /groups mentioned in that list **under /api/v1**. There are only routes for comments, e.g. POST /api/v1/groups/<group_id:num>/comments. Note that /groups within /admin corresponds to a web UI page, e.g. <https://openqa.opensuse.org/admin/groups>.

Ah, ok, that makes sense. I thought that everything on that page are API routes and missed that it also contains routes of the web ui.
