

openQA Tests - action #91956

[opensuse][kde][upgrade] Leap 15.3: LIVE - grub_test - test seems to be wrong grub entry are being looked up in user session (timeout?)

2021-04-29 14:35 - lkocman

Status: New	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Bugs in existing tests	Estimated time: 0.00 hour
Target version:	
Difficulty:	
Description	
Observation	
This test seems to scan grub entries, however test keeps scanning grub menu items after a successful sysytem boot. openQA test in scenario opensuse-15.3-KDE-Live-aarch64-kde_live_upgrade_leap_15.0@aarch64 fails in grub_test	
Test suite description	
Uses the live installer on the kde live media for upgrading the system. +QEMURAM=2048 is necessary as the HDD_1 is only available for aarch64/64-bit and more RAM is necessary.	
Reproducible	
Fails since (at least) Build 9.11	
Expected result	
Last good: 9.10 (or more recent)	
Further details	
Always latest result in this scenario: latest	
Related issues:	
Is duplicate of openQA Tests - action #88972: [opensuse][sporadic] test fails...	New 2021-02-22

History

#1 - 2021-04-29 14:41 - lkocman

- Subject changed from Leap 15.3: grub_test - test seems to be wrong grub entry are being looked up in gnome-session (timeout?) to Leap 15.3: LIVE - grub_test - test seems to be wrong grub entry are being looked up in user session (timeout?)

Similar to this one <https://openqa.opensuse.org/tests/1718531#step/mediacheck/19> we hit same issue in Xfce tests suite

#2 - 2021-04-30 07:49 - tjrinki_suse

- Subject changed from Leap 15.3: LIVE - grub_test - test seems to be wrong grub entry are being looked up in user session (timeout?) to [opensuse][kde][upgrade] Leap 15.3: LIVE - grub_test - test seems to be wrong grub entry are being looked up in user session (timeout?)

- Start date deleted (2021-04-29)

#3 - 2021-05-18 08:36 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: kde_live_upgrade_leap_15.0@aarch64
<https://openqa.opensuse.org/tests/1736031>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released"
3. The label in the openQA scenario is removed

#4 - 2021-06-10 05:18 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: mediacheck
<https://openqa.opensuse.org/tests/1776277>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released"
3. The label in the openQA scenario is removed

#5 - 2021-06-11 14:10 - favogt

- Is duplicate of action #88972: [opensuse][sporadic] test fails in grub_test added

#6 - 2021-06-11 14:11 - favogt

- Status changed from New to Rejected

openQA is too slow to interrupt grub's timeout, so this is a dup of poo#88972.
