

## openQA Infrastructure - action #92034

coordination # 91646 (Blocked): [saga][epic] SUSE Maintenance QA workflows with fully automated testing, approval and release

coordination # 89062 (Blocked): [epic] Simplify review for SUSE QAM

### Re-enable openqa-investigate options after the black certificate now only shows properly "reviewed" jobs

2021-04-30 13:23 - okurz

<b>Status:</b>	Resolved	<b>Start date:</b>

<b>Target version:</b>	Ready		

#### Description

#### Motivation

openqa-investigate was disabled for SUSE Maintenance job groups on special request due to special workflows however other SUSE QAM reviewers like the idea of openqa-investigate so we would like to bring it back and resolve that special exception

#### Acceptance criteria

- **AC1:** openqa-investigate jobs are also scheduled for jobs in "Maintenance" job groups on openqa.suse.de

#### Suggestions

- Crosscheck with dzedro and potentially other members of the review group "qam-openqa-review" if that's ok
- Remove the special exception from <https://gitlab.suse.de/openqa/salt-states-openqa/-/blob/master/openqa/server.sls>

#### History

SR containing initial discussion: [https://gitlab.suse.de/openqa/salt-states-openqa/-/merge\\_requests/425](https://gitlab.suse.de/openqa/salt-states-openqa/-/merge_requests/425)

There were 3 points:

comments are hiding failures and reviewer does not know if comment is his or from "investigate:retry"

This point has been addressed by the mentioned change regarding the certificate icon.

MM tests are not restarted properly ...

When I remember correctly, I've changed it to exclude tests with dependencies completely. So this shouldn't be an issue anymore (although a real solution for this would of course be better).

restarted jobs are renamed, thus don't belong to the same group as original and bot does still see the failed job and auto approve of RR is blocked <https://openqa.suse.de/tests/5251199#comments><https://openqa.suse.de/tests/5251564#comments>  
<https://openqa.suse.de/tests/5251780#comments>

Not sure about this one. It doesn't seem like openqa-investigate doesn't make the problem worse - it just doesn't help for approving some PRs automatically.

Draft SR for enabling this: [https://gitlab.suse.de/openqa/salt-states-openqa/-/merge\\_requests/484](https://gitlab.suse.de/openqa/salt-states-openqa/-/merge_requests/484)

Draft SR for enabling this: [https://gitlab.suse.de/openqa/salt-states-openqa/-/merge\\_requests/484](https://gitlab.suse.de/openqa/salt-states-openqa/-/merge_requests/484)

merged. I assume after deployment we still need to restart the instance. I restarted the webUI on osd with `systemctl restart openqa-webui` and verified that everything looks normal. I suggest you write a message, e.g. in #testing and call this done

**#4 - 2021-05-05 14:04 - okurz**

- *Status changed from Workable to In Progress*

**#5 - 2021-05-05 17:43 - okurz**

- *Status changed from In Progress to Resolved*

Posted in <https://chat.suse.de/channel/testing?msg=d88Xbgym4W8YmPqDW> . Following <https://openqa.suse.de/tests?match=:investigate>: we can see again investigation jobs for Maintenance jobs, e.g. <https://openqa.suse.de/tests/5934726> so all good.
