Description

Motivation

See parent [#80546](#) . To be able to scale-up openQA we want to be able to separate recent openQA results (on expensive+fast storage) from older, important openQA results (on slow+cheap storage). With [#91782](#) we have an archiving feature which we can use within osd in conjunction with storage.qa.suse.de

Acceptance criteria

- **AC1:** results on openQA osd can be automatically archived to /space-slow on osd itself

Suggestions

- Make all the changes persistent within salt
- Enable in /etc/openqa/openqa.ini

- Assignee deleted (mkittler)

#4 - 2021-06-11 15:47 - okurz

- Status changed from Workable to New

We should update the ticket to save the archive to /space-slow on OSD instead and save a backup to storage.qa as NetApp storage backing osd is more reliable

#5 - 2021-07-15 11:22 - okurz

- Description updated
