coordination # 93668 (New): [epic] Redesign Installation test modules

Implement test module for Product selection using LibyuiClient in YaST Job Group

2021-05-24 10:57 - syrianidou_sofia

Status:	Closed	Start date:	2021-05-24
Priority:	Normal	Due date:

Category:		Estimated time:	0.00 hour
Target version:	SLE 15 SP3		

Description

Until now, we are using welcome module for product selection on SLE. This covers multiple scenarios, as identified in [#88939](#). We should separate the scenarios and create separate modules.

Scope:

Job Groups: YaST

Test Cases: #1 - Select product for installation (Please, see test cases in <https://progress.opensuse.org/issues/93411>), use SLES as a product to select.

Task:

1. Implement test module for the test case using [Page Object Model](#) and LibyuiClient;
2. Check that the proper product is installed: `cat /etc/os-release` and check NAME field;
3. Add this module to all the Test Suites where currently **only project selection** is made (That means: do NOT update test suites where some additional actions except product selection are made, e.g. switch keyboard or validate install source. That will be scope of another ticket).

History

#1 - 2021-05-25 07:55 - oorlov

- Target version set to Current

#2 - 2021-06-01 14:59 - syrianidou_sofia

- Description updated

#3 - 2021-06-08 07:44 - oorlov

- Subject changed from Separate welcome module to Implement test module for Product Selection screen using LibyuiClient

- Description updated

- Target version changed from Current to SLE 15 SP3
