coordination # 93668 (New): [epic] Redesign Installation test modules

Use accept_license module with libyui-rest-api in all test suites in YaST, TW and Leap 15 Job Groups

2021-05-24 11:03 - syrianidou_sofia

Status:	Closed	Start date:	2021-05-24
Priority:	Normal	Due date:

Category:		Estimated time:	0.00 hour
Target version:	SLE 15 SP3		

Description

There is accept_license module, implemented with LibyuiClient already:

https://github.com/os-autoinst/os-autoinst-distri-opensuse/blob/master/tests/installation/licensing/accept_license.pm. It is already used in [installer_extended](#) test suite.

Scope:

Job Groups: YaST, openSUSE Tumbleweed, openSUSE Leap 15

Test Cases: #1 - Accept license agreement (Please, see test cases in <https://progress.opensuse.org/issues/93282>).

Task

1. Replace the old accept_license module with the new [accept_license](#) module in all the test suites for SLE15-SP3 YaST Job Group;
2. Adapt existing implementation to be used on Tumbleweed and openSUSE Leap 15 also (i.e. use DistributionFactory to provide the proper controller for TW and Leap, so that the test module remains same, but implementation of get_license_agreement()->accept_license() is different), as on TW and Leap there is no checkbox for accepting License.
3. Replace the old accept_license module with the new [accept_license](#) module in all the test suites for Tumbleweed and openSUSE Leap 15.

Important Notes:

All the cases that do not related to accepting license are out of scope:

- switch_keyboard_gnome/textmode is out of scope and will be implemented in separate ticket, so for now please leave the old 'welcome' module there for such cases;
- Product Selection Screen is out of scope, it will be implemented in separate ticket.

The new module should replace the old "accept_license" used in SLE, and "welcome" module used in opensuse. It should work for both textmode and graphical installations. Please see identified scenarios in [#88939](#) as additional help.
