Description

Observation

openQA test in scenario opensuse-Tumbleweed-DVD-x86_64-desktopapps-gnome@64bit fails in [nautilus_cut_file](#)

Test suite description

Maintainer: gkzhu@suse.com
See <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/3558>
and
poo#23884

Reproducible

Fails since (at least) Build [20201119](#)

Expected result

Last good: [20201117](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2021-06-11 05:19 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: desktopapps-gnome
<https://openqa.opensuse.org/tests/1778715>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released"
3. The label in the openQA scenario is removed

#2 - 2021-06-16 00:57 - GraceWang

There are 5 test cases that failed, among them, "nautilus_permission" and "login_test" have already fixed by adding new needles. The other 3 test cases "nautilus_cut_file", "application_starts_on_login" and "change_password" need code change.

#3 - 2021-06-16 08:07 - GraceWang

- Status changed from New to In Progress
- % Done changed from 0 to 80

PR <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/12718> has been created to fix this issue.

Needles:

TW: os-autoinst/os-autoinst-needles-opensuse#728

SLE15SP3: https://gitlab.suse.de/openqa/os-autoinst-needles-sles/-/merge_requests/1539

Verification runs:

TW: <http://10.163.42.54/tests/1781>

SLE15SP3: <http://10.163.42.54/tests/1780>

#4 - 2021-06-17 08:52 - GraceWang

Code change and needles are merged.

Verification runs on o.s.d:

<https://openqa.suse.de/tests/6279031> x11-desktopapps-gnome@64bit-2gbram

<https://openqa.suse.de/tests/6278391> wayland-desktopapps-gnome@64bit-virtio-vga

#5 - 2021-06-28 08:44 - GraceWang

- Status changed from *In Progress* to *Feedback*

- % Done changed from 80 to 100

The login_test failure will be resolved after the <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/12715> gets merged.

See comments in the above PR for more details.

#6 - 2021-06-28 08:45 - GraceWang

- Status changed from *Feedback* to *Resolved*

#7 - 2021-07-13 01:42 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: desktopapps-gnome-x11

<https://openqa.opensuse.org/tests/1836385>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The label in the openQA scenario is removed

#9 - 2021-08-20 06:24 - GraceWang

- Status changed from *Feedback* to *Resolved*

Actually, the desktopapps-gnome-x11 failure has been fixed by the PR <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/12965>

Details can be found from <https://progress.opensuse.org/issues/95789>

But from recent history, we can see the application_starts_on_login fails 7 out of 10 times **on aarch64** due to performance issues.

See https://openqa.opensuse.org/tests/1880136#step/application_starts_on_login/36

Since there's no such issue on x86_64, so I will close this issue and file a new ticket to track the application_starts_on_login failure **on aarch64**
