

openQA Tests - action #93270

coordination # 91142 (Workable): [qe-core][epic] add product QE exclusive tests to QEM runs to increase coverage

action # 91193 (In Progress): [qe-core][qem] Add existing console Product QE tests to QEM

[qe-core][qem] Schedule vsftpd in s390x runs

2021-05-31 10:12 - punkioudi

Status:	Workable	Start date:	2021-07-21
Priority:	Normal	Due date:	
Assignee:	punkioudi	% Done:	0%
Category:	New test	Estimated time:	0.00 hour
Target version:			
Difficulty:			
Description			
The vsftpd.pm fails in s390x, because of the following [bug] When the bug is resolved, vsftpd has to be removed of the conditional <code>_schedule</code> -> <code>arch_specific</code> area in <code>schedule/qam/common/mau-extratets2.yaml</code> and be transferred to <code>schedule</code> area in the same yaml file.			
Acceptance criteria			
<ul style="list-style-type: none">• AC0 Help is provided to Peter Simons with understanding what the vsftpd test suite is doing, and this information is documented in a separate ticket, to serve as building block for a test rewrite in the future.• AC1 Soft fail on s390 when the failure is the one mentioned in the bug (500 OOPS: vsftpd: security: 'one_process_model')• AC2 Verify the bugfix• AC3 Schedule tests/console/vsftpd in <code>schedule/qam/common/mau-extratets2.yaml</code> in <code>schedule</code>			
Suggestions			
The change would require to evaluate the exit code of the test run (the bash script), and evaluate the logs to search for the string, before either soft failing or failing in case another problem arises.

Alternatively, rewriting the test itself would be a good idea.

In general right now Peter Simons needs a bit of help understanding what the test is doing https://bugzilla.suse.com/show_bug.cgi?id=1176813#c19,

I adjusted the AC to reflect it
