<b>Target version:</b>	SLE 15 SP3		

#### Description

### Observation

openQA test in scenario opensuse-Tumbleweed-DVD-x86\_64-yast2\_ncurses@64bit fails in [yast2\\_ftp](#)

### Test suite description

Maintainer: qsf-y Test for yast2 UI, ncurses only. Running on created gnome images which provides both text console for ncurses UI tests as well as the gnome environment for the GUI tests.  
riafarov set TIMEOUT\_SCALE to improve stability of the test.

Based on the findings from [https://bugzilla.opensuse.org/show\\_bug.cgi?id=1183786#c9](https://bugzilla.opensuse.org/show_bug.cgi?id=1183786#c9)

Thanks Oleksandr! I just double-checked and DSA is not allowed in TW for the DEFAULT policy and RSA >should have a minimum of 2048 bits. So, yes, if you could update the test to use at least rsa:2048, >that would solve it.

Request to adjust the used certificate to RSA >= 2048bits

### Reproducible

Fails since (at least) Build [20210226](#)

### Expected result

Last good: [20210225](#) (or more recent)

### Further details

Always latest result in this scenario: [latest](#)

#### History

##### #1 - 2021-06-09 07:53 - maritawerner

[oorlov](#) The maintainer of this test module is not in the SUSE QE department anymore. Could the yast team take over here?

##### #2 - 2021-06-09 08:06 - okurz

- Subject changed from *yast2\_ftp: we need to create a different certificate* to *[qe-yast][y] yast2\_ftp: we need to create a different certificate*
- Assignee set to [oorlov](#)

[oorlov](#) assigning to you and the team just to make sure the above question is not overlooked as I assume you would not see this ticket otherwise
