**Description**

### Motivation

As a member of the qa-tools squad, I want to teach myself how to program in perl as well as best practices, in order to be able to contribute in all aspects of openQA development.

### Acceptance criteria

- **AC1:** Know the basics and best practices of Perl programming and be able to write sufficiently complex code
- **AC2:** Be able to read and understand existing Perl code in openQA repositories

### Tasks

- read [http://modernperlbooks.com/books/modern\\_perl\\_2016/index.html](http://modernperlbooks.com/books/modern_perl_2016/index.html) (suggestion by okurz)
- test acquired knowledge by examining openQA code

### Further details

Everyone who wishes to contribute learning/training resources regarding Perl can do so in the comments.
