Assignee:	zluo	% Done:	0%
Category:	New test	Estimated time:	0.00 hour
Target version:	QE-Core: Ready		
Difficulty:			
Description			
<ul style="list-style-type: none">• create or change tomcat.yaml for Tumbleweed• create required needles of tomcat on Tumbleweed• create test suite tomcat on O3 and schedule it			

History

#1 - 2021-06-11 14:50 - zluo

- Tracker changed from coordination to action

#2 - 2021-06-17 08:41 - zluo

all required needles created now:

<https://github.com/os-autoinst/os-autoinst-needles-opensuse/pull/730>

#3 - 2021-06-18 06:12 - zluo

<https://openqa.opensuse.org/tests/1792382#step/tomcat/169> shows problem with login, investigating.

#4 - 2021-06-18 06:20 - zluo

<https://openqa.opensuse.org/tests/1793415> looks good. The failed test could related to performance of worker. Need to check further.

#5 - 2021-06-21 14:13 - zluo

<http://10.160.64.152/tests/3118#step/tomcat/46>

I experience the issue not so many times, but it is sporadic.
save password and then match 'tomcat-web-application-manager' failed after 60 sec.

#6 - 2021-06-23 06:25 - zluo

- Status changed from In Progress to Resolved

the latest test run looks good on O3.

I will open a ticket if sporadic issue happens again for Tumbleweed. I checked by over 100 test runs and I believe it is related to performance.
