Target version:	SLE 15 SP3		

Description

Scope:

"Maintenance:QR" > "Maintenance - QR - SLE15SP3" Job Group: https://openqa.suse.de/group_overview/373

Motivation

To not introduce test failures in the Job Group when changing schedule in YaST Job Group. The solution is to create separate schedule for QR Job Group.

Task:

1. Create/duplicate the schedules for QR job group;
2. Use the same structure inside the QR directory as we have in yast directory;
3. Update Job Group settings in qam repo: <https://gitlab.suse.de/qa-maintenance/qam-openqa-yml>
