coordination # 71242 (In Progress): [epic] Unify validation in the installed system

### Unify test data for guided partitioning

2021-06-16 06:20 - JERiveraMoya

<b>Status:</b> New	<b>Start date:</b> 2021-06-16
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b>	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b> Current	
<b>Description</b>	
Recently it was created this structure for handling guided partitioning with REST API:	
<pre>test_data:   guided_partitioning:     filesystem_options:       root_filesystem_type: ext4</pre>	
Later on we realized it would not be efficient to have a different data structure for each module we create as far as we could use a common shared structure. For expert partitioning we already have that structure:	
<pre>disks: - name: vda   table_type: gpt   allowed_unpartitioned: 0.00GB   partitions: - name: vda2   formatting_options:     filesystem: ext4   mounting_options:     should_mount: 1     mount_point: /</pre>	
As we can see, we are repeating the information, in this example filesystem 'ext4'.	
AC1: Rewrite <a href="#">guided_setup.pm</a> so we can iterate over common structure and extract mount point and filesystem. AC2: Run verification wherever the module is used (TW x86_64, TW aarch, Leap, SLES, maintenance updates).

**#13 - 2021-06-16 08:52 - oorlov**

Please, create schedule part first (<https://progress.opensuse.org/issues/94069>), before working on that ticket.

**#14 - 2021-07-20 16:16 - oorlov**

- Target version changed from *SLE 15 SP3* to *Current*

**#15 - 2021-07-28 13:48 - JERiveraMoya**

- Status changed from *Workable* to *New*

**#16 - 2021-07-28 13:50 - JERiveraMoya**

we should wait with this until we progress further with interactive installation, as we might not even need test data if we create separate test modules for each guided setup.
