

openQA Tests - action #94090

[qe-core][qac][study] End-to-end combination test scenarios

2021-06-16 08:36 - tjrinki_suse

Status:	New	Start date:	2021-06-17
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Spike/Research	Estimated time:	0.00 hour
Target version:			
Difficulty:			
Description			
Researching end-to-end scenarios combining multiple SUSE technologies and popular real life uses across functional areas into test cases.			
The focus is on testing the combination, not any specific component.			
Subtasks:			
action # 94174: [opensuse] Enable k3s and Rancher tests in openqa.suse.de			New
action # 94829: [qe-core] Web/app serving end-to-end scenario			New
action # 94832: [qe-core] Development collaboration service automated deployment test			New

History

#1 - 2021-06-16 08:41 - tjrinki_suse

- Description updated

#2 - 2021-06-17 13:12 - szarate

- Claim as QE Core the ownership of end to end scenarios
- PO to work on having more defined E2E scenarios (For instance: Deploy gitlab on rancher with auto scaling?, Deploy postgresql and run pgbench)
- Have the k3s and rancher tests enabled for osd (Maintenance and Product for 15-sp3+)

#3 - 2021-06-18 12:49 - jlausuch

I wonder if we are stepping onto each other's area. Isn't K3S containers topic? :)

#4 - 2021-06-22 06:53 - tjrinki_suse

It's not meant to be a containers test, just happening to use a container similar to our tests running on hyperv are not virtualization tests. But when it starts it's also a co-operation just led by QE Core to study some new possible ways of testing.

The last line from szarate related to the already existing cross-team (I've not been involved) k3s + rancher tests that I now fail to find url for, they could be at least used for this study so that it'd be very easy to get k3s running to run the actual tests.

#5 - 2021-06-29 06:16 - tjrinki_suse

- Subject changed from [qe-core][study] Long term stress & stability test to [qe-core][study] End-to-end combination test scenarios

- Description updated

#6 - 2021-06-30 07:12 - okurz

- Subject changed from [qe-core][study] End-to-end combination test scenarios to [qe-core][qac][study] End-to-end combination test scenarios

Updating ticket summary with team tag for "qac" as well as discussed in weekly QE sync.
