- Start date deleted (2021-06-17)

We don't want to run this at this age and time on SLE (where it was last included in SLE repositories in 12-SP5, and test is not run there), could be left to openSUSE but might need to be unscheduled there too if there are trouble and no-one volunteers to maintain it. Desktop QA was asked to schedule it in yaml separately for their use if they want it.
