

openQA Infrastructure - action #94765

Bring openqaworker12 into production (w/o multi-machine test support) size:M

2021-06-28 07:16 - okurz

Status: Workable	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version: future	

Description

Motivation

See [#93050#note-15](#)

Acceptance criteria

- **AC1:** openqaworker12 is verified to be usable for production multi-machine tests
- **AC2:** Same as AC1 but after additional reboots to ensure reboot stability
- **AC3:** openqaworker12 is controlled over salt

Suggestions

- Look into the error report of [#93050#note-15](#)
- Find a good "single-machine test scenario" to verify
- Bring the machine up with a dedicated worker class selection for investigation without tap, e.g. only openqaworker12
- Fix any found problems
- Accept salt key for openqaworker12 on osd sudo salt-key -y -a openqaworker12.suse.de
- Apply full salt state and check for success
- Unpause "openqaworker12: host up alert" https://stats.openqa-monitor.qa.suse.de/alerting/list?state=not_ok
- Crosscheck monitoring results
