coordination # 93668 (New): [epic] Redesign Installation test modules

Implement test module for clock and date configuration

2021-06-29 16:23 - oorlov

Status:	Closed	Start date:	2021-06-29
Priority:	Normal	Due date:	
Assignee:	oorlov	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Current		

Description

Scope

Job Groups: YaST, openSUSE Tumbleweed, openSUSE Leap 15

Test Cases:

#2 - Accept current configuration (test cases: <https://progress.opensuse.org/issues/93288>)

#3 - Accept default configuration (test cases: <https://progress.opensuse.org/issues/93288>)

Task:

1. Implement test modules in accordance with the test cases, using [Page Object Model](#) and LibyuiClient;
2. Implement validation test module for test case #3;
3. Use test case #2 everywhere, replacing tests/installation/installer_timezone.pm;
4. Use test case #3 and validation module in installer_extended test suite.

Note:

There is a code in installer_timezone (the existing test module):

```
# performance ci need install with timezone Asia-beijing
if (check_var('TIMEZONE', 'beijing')) {
    send_key_until_needlematch("timezone-Asia", "up", 20, 1);
    send_key 'tab';
    send_key_until_needlematch("timezone-beijing", "down", 20, 1);
}
```

The needle was never used on OSD and o3. It would be great to communicate with the team who introduced this change and ask them if they still need that part of code to be kept. Because in our test suites, only "Next" button is pressed on this screen, we do not select any timezone.

History

#1 - 2021-06-29 16:59 - oorlov

- Tracker changed from coordination to action

#2 - 2021-06-29 17:01 - oorlov

- Subject changed from Implement test module for accepting current clock and date configuration to Implement test module for clock and date configuration
