Task

1. Create test cases for System Role Screen;
2. Find the cases that already automated and mark them as "Automated" in test cases (If something is automated not exactly as a test case, then note that in the test cases file)
3. Specify test suites where the test case is automated (Especially if some specific test case, that differs from others occur).

Test Cases Requirements

1. Please, use the attached file template from parent ticket (test_cases_template.ods) (In future we'll move the test cases to Test Management system);
2. Each test case should end up with Expected result;
3. For each functionality, add positive test cases first then negative ones;
4. Scope: SLE and openSUSE.

Suggestions

In case of any ambiguity, make things clear by asking all the teams, e.g. testers, developers.
