Description

Observation

Autologin does not happen, first_boot module can't assert desktop needle and fails. Investigate the issue. Try to reproduce manually and if needed, open a bug.

openQA test in scenario sle-15-SP3-Online-x86_64-autologin_yast@64bit fails in [first_boot](#)

Test suite description

Maintainer: jrivera Test automatic login when selected for local user during installation.

Reproducible

Fails since (at least) Build [187.1](#)

Expected result

Last good: [187.1](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2021-07-15 12:58 - syrianidou_sofia

- Tags set to qe-yast-refinement
- Target version set to Current

#3 - 2021-07-20 14:48 - oorlov

Seems to be regression after <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/12831>.

Adding installation/authentication/use_same_password_for_root to schedule should fix the issue.
