Difficulty:			

Description

Observation

I have opened a bug for this https://bugzilla.suse.com/show_bug.cgi?id=1188734

This ticket is to create a openQA workaround for this issue.

There was similar bug https://bugzilla.suse.com/show_bug.cgi?id=1175335 and similar workaround before: <https://progress.opensuse.org/issues/70141>

I will adapt that previous code, and I think this time the workaround should stay instead of getting reverted.

openQA test in scenario sle-15-SP4-Online-x86_64-create_hdd_gnome+we@64bit-2gbram fails in [scc_registration](#)

Test suite description

image creation job used as parent for other jobs testing based on existing installation. To be used as START_AFTER_TEST=create_hdd_gnome+we

Reproducible

Fails since (at least) Build [15.1](#)

Expected result

Last good: (unknown) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2021-08-12 08:47 - zcjia

- Status changed from New to Resolved

Closing. This is SCC config issue. This can not get workaround in tests.
