

## openQA Tests - action #96534

action # 93441 (In Progress): [sle][security][sle15sp4][CC] CC hand over

### [sle][security][sle15sp4][CC] add 'test\_pamfaillock\_xxx' into audit\_test/libpam run list when SLE ship pam\_faillock

2021-08-04 02:55 - Xiaojing\_liu

<b>Status:</b>	Resolved	<b>Start date:</b>	2021-08-04
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Xiaojing_liu	<b>% Done:</b>	100%
<b>Category:</b>	New test	<b>Estimated time:</b>	32.00 hours
<b>Target version:</b>			
<b>Difficulty:</b>			
<b>Description</b>			
For now we don't test pam_faillock in cc testing. It's also controlled in the test code: <a href="https://gitlab.suse.de/security/audit-test-sle15/-/blob/master/audit-test/libpam/run.conf#L51">https://gitlab.suse.de/security/audit-test-sle15/-/blob/master/audit-test/libpam/run.conf#L51</a>			
<pre>if [ [ "\$DISTRO" != "SUSE" ] ] ; then   + pamfaillock_lock   + pamfaillock_unlock fi</pre>			
And according to the message given by Marcus Meissner in <a href="https://gitlab.suse.de/security/audit-test-sle15/-/merge_requests/21#note_335958">https://gitlab.suse.de/security/audit-test-sle15/-/merge_requests/21#note_335958</a>			
<pre>we did not yet ship pam_faillock ... it was requested for STIG, buit not yet added.</pre>			
We need to add the related test cases into test list after SLE ship pam_faillock
