<b>Target version:</b>			
<b>Difficulty:</b>			
<b>Description</b>			
<b>Observation</b>			
<p>This is SLE15SP4 staging with GNOME 40 upgrade.</p> <p>Currently there are 2 failures: x_vt and reboot_gnome.</p> <p>For both tests, we should change their logic to follow the behavior of Tumbleweed, which already has code path for GNOME 40.</p> <p>openQA test in scenario sle-15-SP4-Online-E-Staging-x86_64-gnome@64bit fails in <a href="#">x_vt</a></p>			
<b>Test suite description</b>			
<p>Maintainer: slindomansilla</p> <p>The standard scenario where we mainly just follow installation suggestions without any adjustments as long as the default desktop is gnome.</p>			
<b>Reproducible</b>			
<p>Fails since (at least) Build <a href="#">E.12.14</a></p>			
<b>Expected result</b>			
<p>Last good: (unknown) (or more recent)</p>			
<b>Further details</b>			
<p>Always latest result in this scenario: <a href="#">latest</a></p>			

#### History

#1 - 2021-08-17 08:40 - zcjia

- Status changed from New to In Progress

PR submitted: <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/13078>

#2 - 2021-08-23 06:29 - zcjia

- Status changed from In Progress to Resolved

PR merged and the staging problem solved.
