

openQA Tests - action #96983

coordination # 96980 (Workable): [qe-core][samba_adcli][epic] Tracker for samba_adcli failures

[qe-core][sporadic][samba_adcli] adcli joining domain fails

2021-08-16 13:24 - geor

Status: Workable	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Bugs in existing tests	Estimated time: 0.00 hour
Target version:	
Difficulty:	

Description

Observation

adcli join fails in [samba_adcli](#)

The command `adcli join -v -W --domain geeko.com -U Administrator -C` sporadically results in :

```
Couldn't perform discovery search: Can't contact LDAP server
* Received NetLogon info from: WIN-NHOU56DRDK4.geeko.com
! Cannot set computer password: Authentication error
adcli: joining domain geeko.com failed: Cannot set computer password: Authentication error
```

Increasing the number of retries just reduces the frequency of the failure. For now it has been softfailed.

The expected output of the aforementioned adcli join command can be seen [here](#)

Reproducible

Fails since (at least) Build [ge0r/os-autoinst-distri-opensuse#retry-adcli-join](#) (current job)

Expected result

Last good: [ge0r/os-autoinst-distri-opensuse#retry-adcli-join](#) (or more recent)

History

#1 - 2021-08-19 12:19 - geor

- Description updated

#2 - 2021-09-01 13:31 - okurz

- Category set to Bugs in existing tests

#3 - 2021-09-09 12:45 - tjyrinki_suse

- Status changed from New to Workable

- Start date deleted (2021-08-16)

#4 - 2021-10-01 02:19 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: mau-extratests2

<https://openqa.suse.de/tests/7279550>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#5 - 2021-10-23 00:47 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: mau-extratets2
<https://openqa.suse.de/tests/7510015>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#6 - 2021-11-29 00:37 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: mau-extratets2
<https://openqa.suse.de/tests/7751235>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#7 - 2021-12-09 13:42 - tjyrinki_suse

- Target version set to QE-Core: Ready

Would be nice to work on samba_ad issues (or at least find out which tasks are relevant at the moment) for the next sprint.

#8 - 2021-12-25 00:37 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: mau-extratets2
<https://openqa.suse.de/tests/7903080>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#9 - 2022-01-17 00:34 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: mau-extratets2
<https://openqa.suse.de/tests/7979395>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#10 - 2022-02-01 00:22 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: mau-extratets2
<https://openqa.suse.de/tests/8076001>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#11 - 2022-02-09 09:50 - tjyrinki_suse

- Priority changed from Normal to High

#12 - 2022-02-09 09:50 - tjyrinki_suse

- Target version deleted (QE-Core: Ready)

#13 - 2022-02-09 14:10 - tjyrinki_suse

- Priority changed from High to Normal

#15 - 2022-02-24 00:32 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: mau-extratests2

<https://openqa.suse.de/tests/8212023>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#16 - 2022-03-24 00:52 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: mau-extratests2

<https://openqa.suse.de/tests/8362373>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
