Description

Observation

net ads join occasionally fails in [samba_adcli](#)

The command net ads join --domain geeko.com -U Administrator --no-dns-updates -i occasionally fails with:

```
ads_print_error: AD LDAP ERROR: 53 (Server is unwilling to perform): 0000001F: SvcErr: DSID-031A1236, problem 5003 (WILL_NOT_PERFORM), data 0
```

similar issue for the command net ads leave --domain geeko.com -U Administrator -i'

For now it has been softfailed.

Expected result

Last good: [ge0r/os-autoinst-distri-opensuse#retry-adcli-join](#) (or more recent)

#1 - 2021-08-16 13:37 - geor

- Description updated

#2 - 2021-08-19 15:12 - geor

- Subject changed from [qe-core][sporadic][samba_adcli] net ads join fails to [qe-core][sporadic][samba_adcli] net ads join / leave fails

- Description updated

#3 - 2021-09-01 13:31 - okurz

- Category set to Bugs in existing tests

#4 - 2021-09-09 12:45 - tjyrinki_suse

- Status changed from New to Workable

- Start date deleted (2021-08-16)

#5 - 2021-09-25 00:48 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: mau-extratets2

<https://openqa.suse.de/tests/7142298>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#6 - 2021-10-09 00:54 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: mau-extratests2
<https://openqa.suse.de/tests/7344305>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#7 - 2021-10-23 01:21 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: mau-extratests2
<https://openqa.suse.de/tests/7508712>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#8 - 2021-11-11 07:46 - openqa_review

2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#9 - 2021-11-27 00:35 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: mau-extratests2
<https://openqa.suse.de/tests/7745882>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#10 - 2021-12-09 13:42 - tjyrinki_suse

- Target version set to QE-Core: Ready

Would be nice to work on samba_ad issues (or at least find out which tasks are relevant at the moment) for the next sprint.
