**Description**

- Syntax checkers for coding style

  In an existing Perl module or a new file is created, avoid the mix between my $self = shift and my ($self) = @_ for parameter parsing and the suggestion is to stick to my ($self) = @. Implement CI check to verify the parameter parsing in the files.

**AC's for each item**

- AC1: Each subtask is proposed as an RFC in the os-autoinst-distri-opensuse repo.
- AC2: There's a corresponding entry in the contributing document.
- AC3: A CI check to verify parameter parsing in the newly created/edited files similar to [PR]

**History**

#1 - 2021-08-18 09:30 - dvenkatachala
- Parent task changed from #95161 to #96596

#2 - 2021-08-18 09:31 - dvenkatachala
- Subject changed from Add syntax checkers to the CI to propose changes over old coding style to [qe-core][CI] Add syntax checkers to the CI to propose changes over old coding style

#3 - 2021-08-18 09:34 - dvenkatachala

Hi Dee, I am not sure if this PR: [https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/13323](https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/13323) serves the purpose of the CI story. Plus, this ticket doesn't have a description of what you are trying to achieve within this ticket :)
