Create workaround for s390x polkit unexpected popup

2021-08-19 14:42 - syrianidou_sofia

Status:	Rejected	Start date:	2021-08-19
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Current		
Description			
After reporting bug#1177446 and getting a WONTFIX reply, it makes sense to add a soft failure for the occasions that polkit popup appears unexpectedly, instead of having test failures.			
The popup appears after Desktop login: https://openqa.suse.de/tests/6887955#step/first_boot/8			

History

#1 - 2021-08-19 14:43 - syrianidou_sofia

- Project changed from openQA Tests to qe-yast

- Tags set to qe-yast-refinement

- Target version set to Current

#3 - 2021-09-22 08:10 - JERiveraMoya

@sofia do we have any recent failure of this problem?

#4 - 2021-09-22 08:35 - syrianidou_sofia

Yes, openqa is reporting linked failures on the bug. This month it happened twice: See last one

https://bugzilla.suse.com/show_bug.cgi?id=1177446#c56

#5 - 2021-10-19 00:13 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: lvm-encrypt-separate-boot

<https://openqa.suse.de/tests/7430231>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234
