test fails in releasenotes_origin

2021-08-20 14:17 - syrianidou_sofia

Status:	Closed	Start date:	2021-08-20
Priority:	High	Due date:	2021-09-23
Assignee:	rainerkoenig	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	Current		

Description

After contacting the yast team to clear up what is expected, the system gets release notes mostly from URL as they are more up to day, unless there is no availability (offline installation, not released notes yet, etc) so it gets it from RPM. The particular failure occurs because the release notes for SP4 are not yet available via URL. We can add a workaround for releasenotes_origin.pm line:24, so it doesn't fail for now. Also, we could schedule the module to offline installation test suite, where we would always expect RPM as release notes origin: <https://openqa.suse.de/tests/6887000>

Observation

openQA test in scenario sle-15-SP4-Full-aarch64-releasenotes_origin+unregistered@aarch64 fails in [releasenotes_origin](#)

Test suite description

Test fate#323273 - Check the origin (rpm or url) of the showed release notes.

Reproducible

Fails since (at least) Build [18.1](#)

Expected result

Last good: (unknown) (or more recent)

Further details

Always latest result in this scenario: [latest](#)
