Description

There are two failures that look similar. The error message is the same, the architecture is the same, but the point of the error occurrence is not at the same step of installation. We need to check the relevance of the two failures, reproduce the issues manually and collect data for a bug report,if needed.

Test 1

openQA test in scenario sle-15-SP4-Online-ppc64le-activate_encrypted_volume+force_recompute@ppc64le fails in
default_user_simple_pwd

Last good: 18.1 (or more recent)

Always latest result in this scenario: latest

Test 2

openQA test in scenario sle-15-SP4-Online-ppc64le-crypt_no_lvm@ppc64le fails in
await_install

Last good: (unknown) (or more recent)

Always latest result in this scenario: latest
