[timebox: 24h] Investigate failure in rebootmgr

2021-08-22 15:22 - syrianidou_sofia

Status:	Closed	Start date:	2021-08-22
Priority:	Normal	Due date:	
Assignee:	JERiveraMoya	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Current		
Description <p>The transactional server cannot reconnect to redcurrant-* via rebootmgr. Not sure if related but "--no-selfupdate" option is missing from command https://openqa.suse.de/tests/6914085#step/rebootmgr/6 We need to check if the update before reconnection is causing the connection issue, if not, try to find the problem.</p>			
Observation <p>openQA test in scenario sle-15-SP4-Online-ppc64le-transactional_server_helper_apps@ppc64le-hmc-single-disk fails in rebootmgr</p>			
Test suite description <p>Testsuite maintained at https://gitlab.suse.de/qa-maintenance/qam-openqa.yml. Test transactional updates with Btrfs and helper applications in a transactional update server.</p>			
Reproducible <p>Fails since (at least) Build 18.1</p>			
Expected result <p>Last good: (unknown) (or more recent)</p>			
Further details <p>Always latest result in this scenario: latest</p>

History

#1 - 2021-08-22 15:23 - syrianidou_sofia

- Project changed from openQA Tests to qe-yast
- Category deleted (Bugs in existing tests)

#2 - 2021-08-23 10:29 - JERiveraMoya

- Target version set to Current

#3 - 2021-08-25 12:51 - JERiveraMoya

- Subject changed from test fails in rebootmgr to Investigate failure in rebootmgr

#4 - 2021-08-26 07:44 - JERiveraMoya

- Status changed from New to In Progress
- Assignee set to JERiveraMoya

#5 - 2021-08-26 09:56 - JERiveraMoya

PR: <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/13135>

cannot reach that module 'yet' but the problem might be caused by different logic introduced a time ago for PowerVM.

#6 - 2021-09-02 11:43 - JERiveraMoya

- Status changed from *In Progress* to *Feedback*

#7 - 2021-09-07 05:41 - JERiveraMoya

- Status changed from *Feedback* to *In Progress*

#8 - 2021-09-07 07:04 - JERiveraMoya

Finally we found that there were recent changes in transactional source code since May, where approximately started to fail, I'm going to try to revert them to check if they are the cause of the failure.

One example of PR on that time, but there are more than this one: <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/12547/files>

#9 - 2021-09-15 10:35 - JERiveraMoya

@vogtinator gave us [some hints](#), I will try with next build, I could not reproduce it, once I revert some code I got failure in previous test modules, and due it is powerVM and there is not booting from snapshot takes a lot of time to reproduce it.

#10 - 2021-09-20 04:47 - JERiveraMoya

- Subject changed from *Investigate failure in rebootmgr* to *[timebox: 24h] Investigate failure in rebootmgr*

#11 - 2021-09-20 04:51 - JERiveraMoya

- Status changed from *In Progress* to *Closed*

After investigation, created: <https://progress.opensuse.org/issues/98832>
