

openQA Tests - action #97772

[migration][zypper_migration][qem][maint] test fails in zypper_migration - test keeps failing after related bug is closed as fixed

2021-08-31 13:40 - vsvecova

Status:	Resolved	Start date:	2021-08-31
Priority:	Normal	Due date:	
Assignee:	dzedro	% Done:	100%
Category:	Bugs in existing tests	Estimated time:	0.00 hour
Target version:	QE-Core: Ready		
Difficulty:			
Description			
This failure has been occurring still, even though the related bug (bsc#1183744) has been closed and verified as fixed for several months already.			
Observation			
openQA test in scenario sle-15-SP1-Server-DVD-HA-Incidents-x86_64-qam_ha_rolling_upgrade_migration_node01@64bit fails in zypper_migration			
Test suite description			
The base test suite is used for job templates defined in YAML documents. It has no settings of its own.			
Reproducible			
Fails since (at least) Build :16502:rubygem-actionpack-5_1			
Expected result			
Last good: (unknown) (or more recent)			
Further details			
Always latest result in this scenario: latest			

History

- Subject changed from *[zypper_migration][qem][maint] test fails in zypper_migration - test keeps failing after related bug is closed as fixed* to *[migration][zypper_migration][qem][maint] test fails in zypper_migration - test keeps failing after related bug is closed as fixed*

oh, I just found this ticket minutes after I reopened https://bugzilla.suse.com/show_bug.cgi?id=1183744 as the reminder comments in https://bugzilla.suse.com/show_bug.cgi?id=1183744 also point to openQA jobs which show what look like exactly the same problem as originally that the option "-D" is not understood.

Adding "[migration]" team keyword as this looks to be a "migration" specific problem.

#2 - 2021-09-16 01:04 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: qam_ha_rolling_upgrade_migration_node01 <https://openqa.suse.de/tests/7071144>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#3 - 2021-09-20 11:35 - vsvecova

I wonder if this test wouldn't be better off removed for the time being, as it is not bringing much value while it's constantly failing, and it has been breaking automated approvals for the qam-openqa review group.

bsc#1183744 is currently still open and I assume it is going to take some time till someone gets around to fixing it.

Edit: I realized that the correct bug is most likely bsc#1184347 (not 1183744), so I reopened it and updated with a comment.

#4 - 2021-09-20 14:07 - jadamek

As it's clearly a bug and not an infra or test issue, if the test is removed, I'm not sure someone will pay attention and will add it back to the jobgroup. But this is just my point a view, do like you usually do.

#5 - 2021-09-29 13:21 - dzedro

- Status changed from *New* to *In Progress*

- Assignee set to *dzedro*

<https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/13358>

#6 - 2021-09-29 13:51 - dzedro

- Status changed from *In Progress* to *Resolved*

- % Done changed from *0* to *100*

Workaround implemented, but don't know how this issue will be solved for customers.

#7 - 2021-09-30 13:37 - dzedro

- Target version set to *QE-Core: Ready*
