coordination # 93668 (New): [epic] Redesign Installation test modules

Implement Partitioning Scheme in Guided setup using client libyui-rest-api

2021-09-21 10:15 - JERiveraMoya

Status:	Closed	Start date:	2021-09-21

Target version:	Current		

Description

Implement 3 test cases we have related with this dialog:

(1) Implement skipping partitioning schema setup: https://openqa.suse.de/tests/7125748#step/encrypt_no_lvm/2 when we don't setup anything for this screen (the screenshot is from a job where we do setup things, but it is not visible, only in video for other jobs this step).

(2) We should refactor encrypt_no_lvm extracting the part for the Partitioning Scheme:

https://openqa.suse.de/tests/7125748#step/encrypt_no_lvm/6

(3) Similar here https://openqa.suse.de/tests/7125749#step/encrypt_lvm/7 where we select lvm.

Examine test data and propose potential improvement (if more tests are affected, better in a follow-up task)
