Description

observation

https://openqa.suse.de/ shows e.g. "SLE 12 SP1 1.Server" and "SLE 12 SP2 1. Server".

problem

Additional space after digit in name. Should be consistent, probably the latter.

suggestion

Should be easy to fix within the web admin interface. I don't have access.

The web admin interface does not offer a way to change existing entries. This has to be done manually in the database, i.e. using postgres command line tool.

History

#1 - 2016-01-05 10:48 - okurz
- Description updated

#2 - 2016-01-05 10:59 - okurz
- Status changed from New to Resolved
- Assignee set to okurz

fixed using PostgreSQL command line tool on openqa.suse.de:

```
geekotest@openqa$ psql -d openqa
openqa=> update job_groups set name='SLE 12 SP2 1.Server' where id = 25;
openqa=> update job_groups set name='SLE 12 SP2 2/Desktop' where id = 26;
openqa=> update job_groups set name='SLE 12 SP2 3/HA' where id = 27;
openqa=> update job_groups set name='SLE 12 SP2 4/Staging' where id = 28;
openqa=> update job_groups set name='SLE 12 SP2 9/Test Development' where id = 29;
```

Every name should be in format w/o the w/s for separating the order number from the product name.
