Beta distribution popup appears after access_beta_distribution

2021-09-30 15:28 - geor

Status:	Rejected	Start date:	2021-09-30
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Current		

Description

The beta distribution popup delays to appear, probably due to changes introduced in the recent build. This results in the failing of the module after the access_beta_distribution module, install_SLES.

Observation

openQA test in scenario sle-15-SP4-Online-ppc64le-RAID5@ppc64le-no-tmpfs fails in [install_SLES](#)

Test suite description

Testsuite maintained at <https://gitlab.suse.de/qa-maintenance/qam-openqa.yml>. Maintainer: slindomansilla, jrauch

Installation of RAID5 using expert partitioner

Reproducible

Fails since (at least) Build [43.1](#) (current job)

Expected result

Last good: [39.1](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

Suggestion

If the BETA test variable is 1, wait for the Beta Distribution popup within a corresponding duration.

Timeout were fixed for libyui, so now it is fixed: <https://openqa.suse.de/tests/7362636>

We could tackle here more specific solution, due to this slow down in already slower architecture: <https://progress.opensuse.org/issues/100907>
