

openQA Tests - action #99582

[qe-core] test fails in x_vt

2021-10-01 07:02 - dimstar

Status: Resolved	Start date: 2021-10-01
Priority: Normal	Due date:
Assignee: favogt	% Done: 100%
Category: Bugs in existing tests	Estimated time: 0.00 hour
Target version:	
Difficulty:	

Description

Observation

openQA test in scenario opensuse-Tumbleweed-GNOME-Live-x86_64-gnome-live@64bit fails in [x_vt](#)

With GNOME 41, Xwayland is launched on-demand, i.e as long as there was no app requesting X access and only pure Wayland apps were started, there is no Xwayland process running

Test suite description

Maintainer: dimstar@opensuse.org

Test for openSUSE GNOME Next Live-Media

EXCLUDE_MODULES is a workaround for https://bugzilla.opensuse.org/show_bug.cgi?id=1138401#c10 (except for opensuse_welcome, which is blacklisted on the GNOME live for space reasons)

Reproducible

Fails since (at least) Build [20210929](#)

Expected result

Last good: [20210928](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2021-10-01 13:21 - maritawerner

- Subject changed from test fails in x_vt to [qe-core] test fails in x_vt

#2 - 2021-10-15 23:59 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: gnome-live
<https://openqa.opensuse.org/tests/1967033>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234

#3 - 2021-10-30 00:00 - openqa_review
