Target version:			
Difficulty:			

Description

Observation

openQA test in scenario sle-15-SP4-Online-x86_64-bcl-product@64bit fails in [scc_registration](#)

Test suite description

Maintainer: QE Core

Enable the hidden product "BCL" and test installation up to boot.
So far this is still under development. We have yet to see how far we can reach.

The testsuite enables the product to be shown in the SLE product list by a special bootloader parameter. This should also auto-select the product but still offer the other SLE products as choice.

See <https://progress.opensuse.org/issues/46181>

Reproducible

Fails since (at least) Build [29.1](#)

Expected result

Last good: (unknown) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2021-10-01 12:32 - zluo

this has never worked for sles 15 sp4 at all.

#2 - 2021-10-16 00:42 - openqa_review

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: bcl-product
<https://openqa.suse.de/tests/7430558>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234
